BMW is held in high regard to their straight six engines, with the M54 being an iconic engine. The M54 engine is a naturally aspirated inline-6 that was primarily featured in the 2000-2006 E46 3-series, in addition to the Z3/Z4 and X3/X5 models of the time. They are known to be overall great performers, reliable, and tons of fun.

In 2001, BMW changed engines in their 3 series 6 cylinder vehicles from the M52 to the M54 motor. The change created a difference in the coil style as well; the M52 engine coil uses two bolts to keep it anchored inside the spark plug tube, where as the M54 engine eliminated the two bolts and is held in place simply by
