Product Information. The martial arts world is rife with tales of ancient masters who could cause instant or delayed death or illness by attacking secret points on the human body. But to the Western mind, the concept of striking acupuncture points to disrupt the internal energy, or chi, seems like hocus-pocus. Thus, many serious martial artists dismiss the ancient art of dim-mak (also known as kyusho jitsu), which is literally translated as "death touch," as nothing more than fiction.

Fight Injuries. The Science Behind Dim Mak death touch Includes dim mak history, theories, techniques, and the medical science behind dim mak, kyusho, pressure points, and vital points. Dim mak (death touch) is an ancient martial art that consists of striking certain points on the body to cause illness or death.

The Science Behind Dim Mak death touch Includes dim mak ...

There is essentially little to no scientific evidence that the “Death Touch” or the pressing of other pressure points can lead to death — but it’s fair to say that certain fighting movements, like a heavy blow to the temple or an obstruction of the breathing tubes, can certainly lead to dizziness, lack of oxygen, unconsciousness — and in severe cases, death.

The Truth About Pressure Points: Which Ones Can Kill You ...

In an effort to spread this knowledge to western practitioners, both medical and combat, Dr. Kelly has published several books, including Death Touch: The Science Behind The Legend Of Dim-Mak. He also wrote several articles, published in magazines like Combat & Healing and Black Belt , the latter of which discusses cases of people dying from dim mak blows received during training and sparring sessions.

Death Touch: The Science Behind the Legend of Dim-Mak book ...

Known in Cantonese as dim mak and in Japanese as kyusho jitsu, the touch of death is said to be something like acupuncture's evil twin. The idea is that chi, or energy, flows through the body along lines called meridians.

Is the "ninja death touch" real? - The Straight Dope

Little scientific or historical evidence exists for a martial arts "touch of death", although it has been confirmed that trauma may cause disproportionately catastrophic consequences when applied to known pressure points under specific circumstances.
