Ford Expedition Starter Relay

Connect a jumper wire from the positive battery terminal to the "S" terminal on the relay. Ask your assistant to turn the ignition key to "Start." If you can now hear a good click, the relay is working properly. If there is a weak or chattering click, or no sound at all, make sure all the connections on the relay are clean and tight.

How to Tell If a Starter Relay Is Bad in a Ford | It Still ...

The starter relay is activated by the ignition switch to connect battery power to the starter. This allows your starter to turn the engine over, and to disengage once the engine is running. If you're having a hard time starting your vehicle, hearing a clicking sound on startup, or if the starter stays on after the engine is running, you may need a new starter relay.
