First things first: the Hayes system uses DOT 3 or DOT 4 mechanical brake fluid. DO NOT USE MINERAL OIL FOR THESE BRAKES!!!!!! Second, the bleed starts from the caliper up to the brake lever. Third, wear gloves. You can get a bleed kit for this system so to prep your bike, you're going to want to remove the caliper from the frame, remove the pads from the caliper and with the end of a 10mm ...

How to Bleed Hayes Hydraulic Brakes - TheBikeTube

adjusting or may require manual adjustment. Disc Brakes. In air-operated disc brakes, air pressure acts on a brake chamber and slack adjuster , like s-cam brakes. But instead of the s-cam, a "power screw" is used. The pressure of the brake chamber on the slack adjuster turns the power screw. The power screw clamps the disc or rotor
