Liferay Help Center

Liferay Portal 6.2 now validates staging updates and warns of potential inconsistencies. To further prevent this problem, you can now disable live changes when remote staging is enabled. Instead of a user name and password combination, you can now set up a pre-shared key between your staging server and your production server, which is more secure.

Liferay employs a specialized theming system, which allows you to change the look and feel of the user interfaces. As a developer, by using the right tools to create and manipulate themes with Liferay Portal, you can get your site to look any way you want it to; but the Liferay theming system can be difficult to get started with.
