Neurological Manifestations Of Allgrove Syndrome

Autonomic neuropathy is also frequently associated with Allgrove syndrome but our patient did not manifest any clinical features of autonomic dysfunction. Other neurological manifestations include mental retardation, optic atrophy, amyotrophy, ataxia, dysarthria, hypernasal speech, dementia, parkinsonism, dystonia, and chorea.

Allgrove (Triple A) Syndrome: A Case Report from the ...

Allgrove syndrome is a rare syndrome with conspicuous neurological abnormalities. We describe a 16-year-old male with Allgrove syndrome suffering from upper and lower motor neuron diseases,...

Neurological manifestations of Allgrove syndrome

The most commonly described abnormal features of the neurologic examination are hyperreflexia, dysarthria, hypernasal speech with palatopharyngeal incompetence, and ataxia. 8 A few cases of Allgrove syndrome with motor neuron disease have been already described. 9 The main aim of our work is to report a case of AAA syndrome that presents a form of a distal spinal muscle atrophy.

Allgrove syndrome and motor neuron disease

[Neurological presentations of Allgrove (AAA) syndrome] [Neurological presentations of Allgrove (AAA) syndrome] Zh Nevrol Psikiatr Im S S Korsakova. 2013;113(4):70-4. [Article in Russian] Authors G E Rudenskaya 1 , E Yu Zakharova, M A Kareva. Affiliation 1 Medical Genetics ...

[Neurological presentations of Allgrove (AAA) syndrome]

Allgrove syndrome is a rare syndrome with conspicuous neurological abnormalities. We describe a 16-year-old male with Allgrove syndrome suffering from upper and lower motor neuron diseases, autonomic dysfunction, muscle weakness, seizure, optic atrophy, ataxia, and peripheral demyelinating polyneuropathy primarily involving distal lower limbs.

CiteSeerX — NEUROLOGICAL MANIFESTATIONS OF ALLGROVE SYNDROME

Allgrove, or triple A, syndrome is a similar disorder to FGD, with additional features of alacrima and achalasia. Presenting in the first decade of life, it is frequently associated with progressive neurologic dysfunction, polyneuropathy, deafness, mental retardation, and hyperkeratosis of palms and soles (Houlden et al, 2002).

Allgrove Syndrome - an overview | ScienceDirect Topics

The authors describe two families with two affected siblings and a further unrelated patient with typical clinical features of Allgrove's syndrome, who exhibit signs of multisystem neurological disease including hyperreflexia, muscle wasting, dysarthria, ataxia, optic atrophy, and intellectual impairment.

Allgrove or 4 “A” syndrome: an autosomal recessive ...

Several authors published descriptions of a more global autonomic disturbance associated with the original Allgrove triad, leading one author to suggest the name 4A syndrome (adrenal insufficiency,...

Allgrove (AAA) Syndrome: Background, Pathophysiology ...

Patients with Allgrove syndrome (type 2 FGD) have no mutations in the coding sequence or the promoter region of this receptor gene. Globally, the pathology of this syndrome may be due, in part, to a progressive loss of cholinergic function throughout the body. Manifestation of AAA syndrome. Adrenal insufficiency; Adrenocorticotrophic hormone resistance

AAA Syndrome: Causes, Symptoms and complications.

Triple A (Allgrove) syndrome is characterized by achalasia, alacrima, adrenal abnormalities and a progressive neurological syndrome. Affected individuals have between two and four of these relatively common clinical problems; hence the diagnosis is often difficult in all but the classical presentation.

Clinical and genetic characterization of families with ...

Most patients (72.8%) display neurological impairment, most frequently distal muscular weakness, hyperreflexia, nasal speech, and autonomic dysfunction. [abstracts.eurospe.org] Neurological examination was normal except for bilateral hyperreflexia without clonus. His performance at school was reported to be satisfactory.

Triple A Syndrome (Allgrove Syndrome): Symptoms, Diagnosis ...

People with triple A syndrome often experience abnormal sweating, difficulty regulating blood pressure, unequal pupil size (anisocoria), and other signs and symptoms of autonomic nervous system dysfunction (dysautonomia).

Triple A syndrome | Genetic and Rare Diseases Information ...

Background/Aims: A 33-year-old man was referred for the first time to the Division of Neurology because of the presence and progression of neurological symptoms. Dysphagia, weakness, reduced tear production, and nasal speech were present. In order to point the attention of late-onset triple A syndrome we describe this case and review the literature.

Late-Onset Triple A Syndrome: A Risk of Overlooked or ...

Abstract: Allgrove syndrome or triple A (3A) syndrome is a multisystem disorder which classically involves the triad of esophageal achalasia, alacrima, and adrenal insufficiency due to adrenocorticotropin hormone insensitivity.

[Full text] Triple A syndrome (Allgrove syndrome ...

We report a young woman with the clinical picture of Allgrove syndrome in whom neurological symptoms are prominent. It usually presents in the first decade of life with a deficiency of tears, recurrent vomiting and dysphagia due to achalasia, severe hypoglycemic seizures and shock due to adrenal insufficiency.

Allgrove Syndrome with Neurological Symptoms - Centogene

This part of the nervous system controls involuntary body processes such as digestion, blood pressure, and body temperature. People with triple A syndrome often experience abnormal sweating, difficulty regulating blood pressure, unequal pupil size (anisocoria), and other signs and symptoms of autonomic nervous system dysfunction (dysautonomia).

Triple A syndrome - Genetics Home Reference - NIH

Serious reported neurological manifestations include dementia, Wernicke's encephalopathy, optic atrophy, cerebellar ataxia, and Parkinsonism. The syndrome has been mapped to a 6 cm interval on chromosome 12q13.

Allgrove syndrome: an Egyptian family with two affected ...

Neuropathy, which means inflammation and/or damage to the peripheral nerves, can be affect patients with Sjögren's syndrome. Neuropathy can cause various symptoms, from "numbness," to "coldness"; in its most severe, neuropathy has been described as "burning", "lancinating", or "feeling like my skin is on fire."

Neurologic Complications : Johns Hopkins Sjögren's Center

Dysfunctional Neurological features of Allgrove syndrome include sensorimotor polyneuropathy, amyotrophy, dysarthria, dysfunction. In a series of eight patients from France all Other neurological...
