Introduction to Survival Analysis 4 2. The Nature of Survival Data: Censoring I Survival-time data have two important special characteristics: (a) Survival times are non-negative, and consequently are usually positively skewed. – This makes the naive analysis of untransformed survival times unpromising.

Introduction to Survival Analysis

While customers are essential to the survival of a business, there's no denying that employees play a significant role to any company. Without a team of workers, you're company wouldn't even be able to operate in the first place. With that being said, your marketing objective must also give importance to the internal elements of the company.
