Reflective journaling is a tool in developing critical thought and reflection through clarifying concepts. It gives nurses the opportunity to define and express clinical experiences in their own words. This improves observation and descriptive skills. Each nurse should examine the personal thoughts and actions through reflective journaling.

**nursing - CMC Vellore**

Both cats and calves have been experimentally infected with EIVs and the infected animals showed clinical symptoms, virus shedding and demonstrated contact transmission [33,34,35]. Interestingly, two H3N8 strains of equine origin, with close relation to the European H3N8 EIVs, were isolated from pigs in China during 2004–2006 .
